# Integrating Business Climate Scenarios into Decarbonisation Plans for Optimal Outcomes

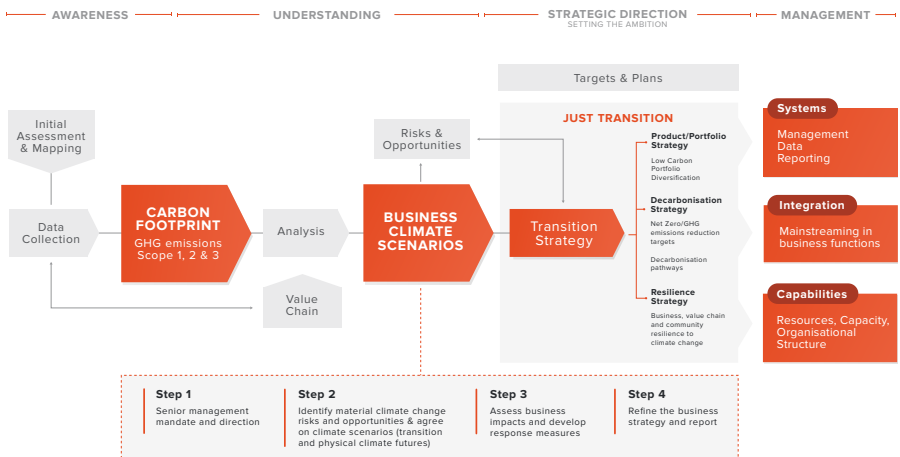

MMS, a leader in mining and industrial solutions, have partnered with sustainability leaders, Climate Horizons, to offer comprehensive and effective decarbonisation advisory and emissions management services. Our unique partnership brings together industry-leading technology, expert advisory services, and practical, cost-effective solutions to help businesses navigate the complexities of their decarbonisation journey.

## Our Comprehensive Decarbonisation Services

### 1. Strategic Decarbonisation Advisory

From Strategy to Execution, We Simplify Your Decarbonisation Journey

- **Custom Roadmaps:** Tailored decarbonisation plans that align with your business objectives and regulatory requirements.
- **GHG Inventory Management:** Comprehensive assessment of your carbon footprint, including Scope 1, 2, and 3 emissions.
- **Target Setting and Scenario Modelling:** Setting achievable GHG reduction targets and exploring various decarbonisation scenarios to find the most cost-effective solutions.

## 2. Decarbonisation Tools and Technology

### Seamless Data Integration and Management for Superior Performance Reporting

#### Integrated Data Solutions

Utilise advanced tools to monitor, manage, and report on GHG emissions.

#### WIRE Platform

A powerful data management system for real-time tracking and reporting of emissions across all business operations.

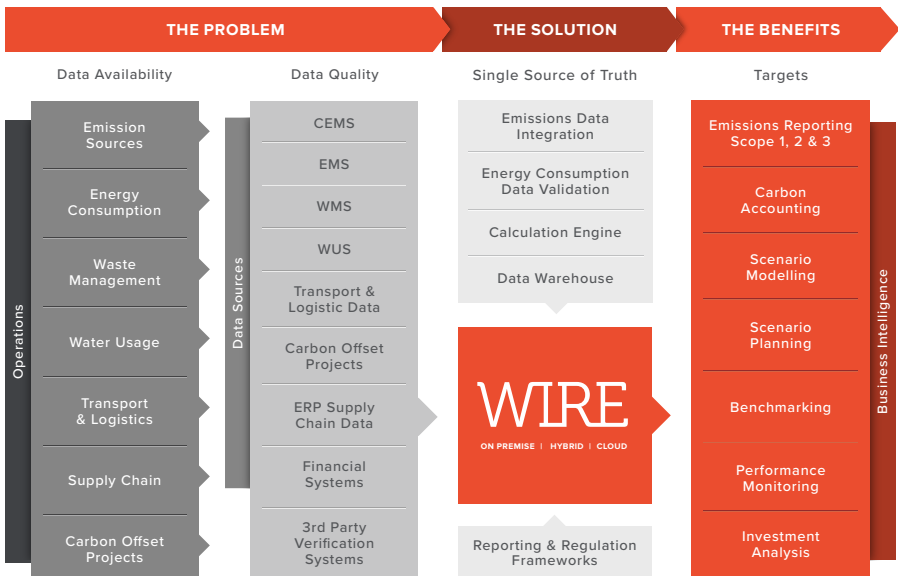

#### Scenario Planning

Tools to simulate and analyze different decarbonisation pathways and levers, and their impacts on your business.

*WIRE is a technology and protocol agnostic platform that can be configured to meet your ESG tracking and reporting needs, and those of the jurisdictions you operate in.*

*WIRE's strength lies in its ability to ingest data from any source, and its flexible component model and advanced calculation engine which allows data to be aggregated and disaggregated for different scales of reporting.*

### 3. Practical Implementation Support

#### On-Site and Remote Services

Flexible support options to meet your operational needs, from on-site audits to remote consultancy, as well as a dedicated WIRE service desk.

#### Operational Roadmap

Step-by-step guidance on implementing your decarbonisation plan, from technology integration to staff training.

#### Compliance and Reporting

Ensure your operations meet international and local regulatory standards and reporting requirements.

### Why Choose Us?

#### Expertise and Experience

Practical insights from MMS and Climate Horizons' decades of experience in sustainability, technology and industrial solutions.

#### Tailored, Strategic Approach

Our services are customised to meet the unique needs of your business, ensuring that your decarbonisation goals are achievable and aligned with your strategic objectives.

#### Ease of Integration

Our proven technology, tools and solutions are designed to seamlessly integrate with your existing operations and business systems, minimising disruption and maximising efficiency.

#### Pragmatic and Effective

We focus on pragmatic solutions that deliver significant emissions reductions while boosting business resilience.

### Our Clients

We are a global organisation with specialists and technical teams across Europe and Africa.

De-risk your emissions future with practical strategy, clear performance tracking and flexible decision support.
